

# David Houston, Let's Build A World Together

I never believed the woman like you existed  
Somewhere along the way my mind got twisted  
But you brought hope and understanding gave sweet love without demanding  
How could I ever dream the more than this  
Let's build a world together just for two  
Let's put our dreams together and watch them all come true  
Let's leave the world of tears and heartaches far behind  
Let's build a world together yours and mine

We fill our world with music and children's laughter  
And cherish every hour we spend together  
And every night we rediscover just how much we love each other  
And dream about the things we'll do tomorrow  
Let's build a world together...  
Let's build a world together yours and mine
