

David Houston, We Got Love

You got me I got you we got love
When we walk in the room they stop talking
But the looks that we get say a lot
Let them think what they're like you and I both know we're right
They'd give the world if they had what we got
We got love and that's all that matters and it gets a little stronger day by day
There's a ring on your hand you're my girl and I'm your man
You got me I got you we got love
[guitar]
They're just jealous because they know we're happy
And I guess that it does show on my face
So let's smile and say hello to everyone we know
We got something that nothing can replace
We got love and that's all that matters...
There's a ring on your hand...
There's a ring on your hand...
