

David Usher, My Biggest Mistake

Help is on the way
Doctor he's says that you're fine
Clean bill of health now
Cold crisp winter's day
Through car windows trees rushing by
The medicines poisoned my mind

And what did you think I would say
And how did you think I could save you
It's my biggest mistake
That I never did lie
I couldn't save you

Sit and stare for hours
Wait for the morning to come
Dream is a nightmare
Hopelessly entwined
Your body feels like it's on fire
An alien love song tonight

And what did you think I would say
And how did you think I could save you
It's my biggest mistake
That I never realized
I couldn't save you

Help is on the way

And what did you think I would say
And how did you think I could save you
It's my biggest mistake
That I never realized
I couldn't save you

"Help is on the way
Doctor he's says that you're fine
Clean bill of health now
Cold crisp winter's day"
