## De Heideroosjes, Fifi

You tell me to conform but I won't You tell me to shut up but I don't You tell me it doesn't make sense To me there is more than hangin out with friends

I can't change the world But you'll hear my voice Don't you think I see it's a mess? Don't you think I hate all this stress Why don't you just stand up and fight

I won't say it will help but I might

I can't change the world But you'll hear my voice

It seems I stand alone in a crowd But I continue to open my mouth If people don't talk anymore They have started a new useless war
