

De/Vision, Obsolete

The dragon heart
For what has once been you there's nothing left now
Got to bow down
You're torn apart
Seem to be here but yet you're fading away
Silent decay

You've got to confess
That your life is a mess
From what I have told you
From what I have said
All that you let me see
The worst for me to believe
You came to go down with
Nothing but defeat
Cause you're obsolete

Role model for
Another generation to take things on
Disposable ones
Running on repeat
An empty tape distorted background noise
A thrown-away toy

Bent nearly broke
That's what they did to you but not anymore
You are long gone and leave an emptiness
That's hard to express
