

Deacon Blue, Into The Good Night

Under the braw city night
And under the warm summer light
The evening begins
The day's been lightened with song
As glad as the winter is long
And so we begin

As far as the stars are from here
We'll travel together my dear
Wherever lovers may go
We'll step out into the good night

And into the farthest of hopes
And tied by the lightest of ropes
We'll sail away
And pulled by the sounds of the waves
And stories of heavenly places
We'll go on our way

As far as the stars are from here
We'll travel together my dear
Wherever lovers may go
We'll step out into the good night

I never even played you this song
Don't know that it might be wrong
You might never say
So let's do what lovers will do
Step out in the gathering rooms
And give love away

As far as the stars are from here
We'll travel together my dear
Wherever lovers may go
We'll step out into the good night
