

Deacon Blue, Out There

I got something and I know it's true
Cause I know you're out there
We all want somebody like you
Cause we all know that you're out there

Animal boys and earthen girls
Are meeting out there
All the friends made in the world
Are waiting out there

I got lost and it all went black
But I saw the light and I got you back
We only love the way we do
Cause there's something out there

Under the stars when it's late at night
I know you're out there
Something knocking and it can't be right
Means we need you're out there
In the city there's a million prayers
Going to someone out there
I found love and it was burning bright
Cause I saw it out there

Beautiful stories you've never heard
Trust me baby you can lean on the wind
We only love the way we do
Cause there's someone out there

Robert Johnson, Harmonica Frank
Digging it out there
Jimmy Rogers on the last train back
Sounds better out there

I got lost and it all went black
But I saw the light and I got you back
We only love the way we do
Cause there's something out there
