

Dead Man Ray, Centrifugitives

Handicaps are cool
If you learn how to exploit them
A dedicated fool
Is always better than a shrink
You're drowning in my pool
I know I'll meet you at the bottom
Cause all unwritten rules
Lead the water to the mule

I can stand it
But we planned it
Like a prepaid distortion
When we canned it
Overmanned it
We collided our dust broom

Were only centrifugitives
Undermining categories
Were only big minorities
Moving targets suddenly freeze
Another dog named after me

Centrifugitive
Don't insist on me to chase you
Solitary myth
Born infused by liquid looks
I'm high on primitive
But undecipherable complexions
These coroners of luck
Drove me to your tender trash

I can stand it
But we planned it
Like a prepaid distortion
When we canned it
Overmanned it
We collided our time broom

Were only centrifugitives
Undermining categories
Were only big minorities
Moving targets suddenly freeze

Were only centrifugitives
Undermining categories
Were only big minorities
Moving targets suddenly freeze
Another dog named after me
