

Dear Juliet, Never Change

If you hear this, wherever you are, just know I need you here, I need you near me now
You were brighter than the pale white moon reflected in your eyes
So I guess it's no surprise, I can't forget you, no matter what I do

I will always carry you in my heart
You'll always be my shooting star
Autumn days will fade away, but memories will always stay the same
I'm hoping you will never change, don't ever change

I just need to slow down for a while, I'm missing your warm smile
And the way you used to say
Stay with me until the daylight breaks, no matter what it takes
just say you'll stay
