

Death By Stereo, Sticks & Stones

All of my own free will
It's not some mindless thrill
I've got my head on straight
And I ain't gonna wait for a mindless threat
An intent to injure
An intent to hurt that I don't sweat

Sticks & Stones
Come on and break my bones
Why do you even try?
You've burned your time
And all of your bridges too
And all the love, you fuck

You can silence some of the people some of their time
But you can't control their minds
(you can't control their minds)
You can staple my mouth shut
You can gouge my eyes
Making a fist can never take away this
You can silence some of the people some of their time
But you can't control their minds
You can staple my mouth shut
You can gouge my eyes
Making a fist can never take away this

All of my own free will
It's not some mindless thrill
I've got my head on straight
And I ain't gonna wait for a mindless threat
An intent to injure
An intent to hurt that I don't sweat

Sticks & Stones
Come on and break my bones
You've burned your time
And all the love, you fuck

You can silence some of the people some of their time
But you can't control their minds
You can staple my mouth shut
You can gouge my eyes
Making a fist can never take away this
You can knock my teeth out
You and your little boy scouts
Making a fist will never take away this
You can staple my mouth
You can gouge my eyes
Making a fist can never take away this
Take away this
Take away this
