

Deborah Gibson, The One

If I could
I would remember
To forget you now and then.
'Cause the sun rose and set on you baby
Time and again
Should you ever doubt
What I think about
Don't it always come right back to you

Chorus:
I meant every word
Every single kiss
Everything you heard
Still lives inside me
Woah
Though others have gone
And more still will come
And time marches on
You'll always be the one

Can't you see through me
Something's missing
Since you dropped from the palm of my hand
With faith I hold tight to the promise
Oh just as tight as one girl can
It's not that I'm denying
I know what we are not...
Oh but

Chorus

Bridge:
You're the best thing I'll never have
Our love it dies in slow motion
You're every star I'll never catch
Over our desert ocean oh
I meant every word
Every single kiss
Everything you heard
Still lives inside me (oh)
Though others have gone
And more still will come
And time marches on
Oh yeah - yeah, yeah, yeah
Don't it always come right back to you

Chorus

You'll always... You'll always be the one
You'll always, always, always be the one
You'll always be the one
