

DecembeRadio, Find You Waiting

I've heard the angels and I've seen the devil
Fought with the lion, sent through the fire
I've been in the valley when it was dry
Walked through the desert to the other side

I'm not a preacher and I'm not a hero
My life has never been that kind
But there is one thing that I hold onto
I am yours, and Lord you are mine

CHORUS

And through all these years You have been there
Dried all my tears and answered my prayers
I just want to feel your presence again
I'm down on my knees in need a friend
And I find you waiting there for me

I've seen a widow cry through her sorrow
And still raise her hands in the midst of it all
And Lord I'm reminded what I was weary
You carried me, yes you carried me

CHORUS

And through all these years You have been there
Dried all my tears and answered my prayers
I just want to feel your presence again
I'm down on my knees in need of a friend
And I find you waiting there.....

BRIDGE

In the midst of a struggle
There is one thing I know
You'll never leave me, no never alone

I've heard the angels and I've seen the devil
Fought with the lion, sent straight through the fire

CHORUS

And through all these years You have been there
Dried all my tears and answered my prayers
I just want to feel your presence again
I'm down on my knees in need of a friend
And I find you waiting
And I find you waiting there for me

Waiting, I find you waiting there
