Deepest Blue, Say Goodbye

I know that you're going to cry I sorry I told you lies The rumours you heard today So sorry you learnt that way

Just give you poppy fields of dreams to Rescue you from me I hope someday you come to understand

Please don't try to wave goodbye Don't throw us away I need you to stay Please don't try to say goodbye Don't throw us away I need you to stay

Lonely as I can be Alone for the world to see A room full of emptiness Out there we're all embraced

You try
Try to be me
Look at all the things
I see

So take away A life today And be the one

Touch
Touch all you can
Try to be a better man
Hold away
Another day

III be, I'll be, I'll be, I'll be and I

I do Let me hold you Take it all away Another hand won't stay

Oh just take my hand And don't be afraid Spread a little love Spread a little love Spread a little love Spread a little love
