

DeepSystem, Hey My Love (BEKULAH Remix)

Hey my love I wanna know
What's your name, where do you go
Hey my love I wanna know
Can you save my soul
Oh I knew from the start
That one day, one day you'll be mine
From the moment I saw
How you act, so don't you deny
Now you're stuck in my head
And it's killing me slowly inside
Cause I don't even know your name
Come close baby, lets take the night
I can see it in your eyes
In your eyes
In your eyes
I can read what's in your mind
In your mind
I can see it in your eyes
In your eyes
I can read what's in your mind
In your mind
In your mind
x2
Hey my love I wanna know
What's your name, where do you go
Hey my love I wanna know
Can you save my soul
You cast a spell on my life
You got deep in my mind
It was love at first sight
Oh lets end this game tonight
x2
Hey my love I wanna know
What's your name, where do you go
Hey my love I wanna know
Can you save my soul
