## Deerhunter, Helicopter

Take my hand and pray with me My final days in company The devil now has come for me And helicopters circling the scene

And I pray for us Would you pray for us Nobody loves you the best We know he loves you the best

Tired of my pain I'm tired of my pain, oh

No one cares for me I keep no company I have minimal needs And now they are through with me

No one cares for me
I have minimal needs
I keep no company
And now they are through with me
Now they are through with me
Now they are through with me
Now they are through with me
