

# Delirious?, Love Will Find A Way

Look around at what you see  
There's an s.o.s. ringing out for me  
I thought I believed but I just turn away  
From these souls living in this hell today

Tears are falling, on my face  
From my face

Love, love will find a way to break through  
This love finds a way to shine through  
Your love, finds a way to break through,  
This love finds a way to kiss you.

I stare in the eyes of this flesh and bone  
I'm a tourist here so tomorrow I go home  
I try to make sense of the things I've seen  
Between the poverty and the five star dream.

Love will lead me to your feet  
Love wont pass me on the street  
Love will look me in the eye  
Love wont leave me here to die  
To your arms I'm gonna run  
And escape what I've become  
Love will find a better way, so they say

Love it will break you  
Love it will take you  
Love it will break you down
