

# Denison Witmer, Around Everything

I need to take a look before you go away  
Before I spend my time with what I need to say  
But you're so free around everyone but me

It's the city lights, and it's a New York sky  
You don't want to hear, 'cause I'm not ever right  
You should be with anyone but me

Then we talk around everything  
We talk, talk, talk around everything

I need to hear a word before you go away  
I need to hear a word before you go away  
You're so free around everyone but me

And then we talk around everything  
We talk, talk, talk around everything  
We talk around everything  
We talk, talk, talk around everything

Talk around everything  
You talk, talk, talk around everything
