Denison Witmer, Around Everything

I need to take a look before you go away Before I spend my time with what I need to say But you're so free around everyone but me

It's the city lights, and it's a New York sky You don't want to hear, 'cause I'm not ever right You should be with anyone but me

Then we talk around everything We talk, talk, talk around everything

I need to hear a word before you go away I need to hear a word before you go away You're so free around everyone but me

And then we talk around everything We talk, talk, talk around everything We talk around everything We talk, talk, talk around everything

Talk around everything You talk, talk, talk around everything
