

# Depeche Mode, Cover Me

I can feel it coming  
the morning light  
the air is so cold here  
it's so hard to breath  
we better take cover  
will you cover me?

way up here with the northern lights  
beyond you and me  
I dreamt of us in another life  
one we've never reached

and you know we're sinking  
we could fade away  
I'm not going down today

the air is so cold here  
to cold to see  
we have to take cover

cover me

way up here with the northern lights  
beyond these broken bars  
I pictured us in another life  
where we're all superstars
