

DeSol, Every Little Love Song

Well hello
I've finally figured out
I was late for September
Indian summer
should of reminded me
now I'm left to remember

Every single day
Every little word
rings true

Every little love song
Everything reminds me of you
Every time the rains come
You and I should be renewed
Every time the phone rings
my heart pumps with anticipation
Sentimental love songs
Everything reminds me
you're far away
we're far away

Oh, late for September

Morning Glories
don't give up on me
Promise I'll make it better
Pouring my heart out on this machine
but aren't you getting the message???

That every single
day we spent
Every little word you said
rings true

Every little love song
Everything reminds me of you
Every time the rains come
you and I should be renewed
Every time the phone rings
my heart pumps with anticipation
Sentimental daydreams
Everything reminds me
we're far away
far away
I'm gonna find a way now

Every little love
this late for September
is ripping out my heart

[bridge]
Every single day we spent
Every little word you said
I don't want to live without you now
I don't want to live...

[chorus]

And I really want to know
I really want to come home soon
What I really want to know is
can I come home
and find a way

find a way
Let us find a way
now
