

Diamond Rio, Finish What We Started

(Monty Powell/Mike Noble)

Lyin' on our backs we stared at the stars
Tryin' to count them or guess how far
I still remember the way that it felt
The night we hung our dreams out on Orion's belt
The moonlight danced out on the water's edge
We started a walk that hasn't ended yet

And step by step and mile by mile
Taking each turn together
Following the signs that point to forever
And side by side
True and tenderhearted
We'll finish what we started

The road we have traveled has sometimes been steep
And we've crossed troubled waters that were raging and deep
But with memories to lean on and love as our guide
There's no path too winding, no river too wide
One foot in front of the other each day
Keeping a promise that two young lovers made

And step by step and mile by mile
Taking each turn together
Following the signs that point to forever
And side by side
True and tenderhearted
We'll finish what we started
