

# Diana Ross, When Will I Come Home To You

(Bob Gaudio/Al Ruzicka/Kathy Wakefield)

Remember me  
A face you used to see  
Not the same song that I used to be  
I had their words passing through me  
But I just can't find the rhymes  
I've been every place but right so many times

When will I come home to you  
Whenever you want me to  
It's a cold and lonely world  
When you're not loving me

Your world is my only one  
I'm back where I started from  
There's no place that I would rather be

Remember me  
The girl who thought that she  
Could get lost in unreality  
I've been around up and down  
I've never missed a single rhyme  
I've been everything there is but satisfied

When will I come home to you  
Whenever you want me to  
It's a cold and lonely world  
When you're not loving me

Your world is my only one  
I'm back where I started from  
There's no place that I would rather be

When will I come home to you  
Whenever you want me to  
It's a cold and lonely world  
When you're not loving me

Your world is my only one  
I'm back where I started from  
There's no place that I would rather be

When will I come home to you  
Whenever you want me to  
It's a cold and lonely world  
When you're not loving me

Your world is my only one  
I'm back where I started from
