Digimon, Fire!!

Throw fire on your sputtering heart!
Race your heart to the horizon

If you kick up your idle feelings
We'll go to the next frontier

Wishes will come true, they'll come true, the combustion point is just ahead
We can, we can do it, we're going to explode
Burn up and go!

Jump over a trashcan and the future awaits
Clad in light, get a fire power!
The power in your eyes glitters and burns
With an inextinguishable courage, get a fire power!
Keep running to the frontier filled with the unknown
"I'll take you with me"

If you need rules, you should just invent them, right?
Sometimes it's necessary to be selfish

Listen to me!! My heart wants to run away!!
I have to do this, even if I'm alone

Where does time come from and where does it go?
I know, I know it, but my questions don't stop
Get up'n go!!

Run up the staircase and a new era awaits
Heartbeat rising, get a fire power!!
The barefoot sun glitters reflectively
With a passion that can't lose, get a fire power!!
Keep running to the frontier filled with the unknown
"I'll take you with me"

Jump over a trashcan and the future awaits
Clad in light, get a fire power!
The power in your eyes glitters and burns
With an inextinguishable courage, get a fire power!
Keep running to the frontier filled with the unknown
"I'll take you with me"
