

Digimon, I Wish (English)

When I wish on a star, with my pride on the wind
I'll surely be able to see a tomorrow that can't be erased by today...

I wish
Why are we here?
Please tell me soon
What we see isn't everything

I'm shivering with the cold, so I cover my arms with a jacket
Before I know it, it becomes transparent
And turns into hope

When the rain of the future wets my cheeks I remember
Be passionate, that day, that time

When I wish on a star, with my pride on the wind
I'll surely be able to see a tomorrow that can't be erased by today...

I wish
If I turn on a switch
I'll be able to fall in love
Until yesterday I believed that, it's a miracle

If I turn around I'll find your heart reflected in your eyes
Because of that, now I'm able
To think it's wonderful to be alive

When the rain of the future wets the city I remember
Shine, that day, that time

When I wish on a star, with my pride on the wind
Look, surely our small wishes will be granted...

When the rain of the future wets my cheeks I remember
Be passionate, that day, that time

When I wish on a star, with my pride on the wind
I'll surely be able to see a tomorrow that can't be erased by today...
