

# Dio, Night Music

Looking on the(?) side  
You're waiting for your life to walk away  
Writings on a wall  
You just dream forever, forever

Face it - it's another day  
And it's gonna be the same tomorrow  
The sun is gonna go away  
So let it shine on - shine on, yeah, yeah

When you move to the rhythm of shadows  
You can hide from the heat of the sun  
'Cos If you dance to the beat of the darkness  
You burn before the fire's begun

Then comes the night  
You come alive

With night music  
It keeps spinning around my head  
Night music  
It's all the things that you never said  
And anywhere you are  
There's night music

So open up your arms  
Let the night time in  
Say the word and it begins

In the night you're the song and the singer  
You can choose what the band's gonna play  
Write the words under cover of moonlight, oh  
Make some magic with the things that you say  
Together we can kill the day

Night music  
You're singer and I'm the song  
Night music  
Where's the place we can belong

Here comes the night  
You will survive  
Dancing in the moonlight  
Makes you feel alive

Open your arms  
Let it begin  
Just open up the magic  
Let the night time in
