

Diplo, Stay Open (feat. MØ)

Even in the darkest hour
you don't have to search so hard
you're the one that holds the power
now's the time to play your part

if you could see your true colors
you wouldn't have to try so hard
hiding under all these covers
we all work the way we are

it's the same with me
and you and everybody
all hold tight our breath
while waiting for the party

so many doors
so many closed to us
baby my heart's open
you know that I stay open

lost in the night
standing outside the club
baby my heart's open
you know that I stay open for you

baby I can read the stars
and I see how they shine for you
don't cave yourself up in the darkness
so many better things to do

wish you could see your true colours
don't be afraid to play your cards
the sky is open you should follow
we all work the way we are

so many doors
so many closed to us
baby my heart's open
you know that I stay open

lost in the night
standing outside the club
baby my heart's open
you know that I stay open for you

it's the same with me
and you and everybody
all hold tight our breath
while waiting for the party

so many doors
so many closed to us
baby my heart's open
you know that I stay open

lost in the night
standing outside the club
baby my heart's open
you know that I stay open for you
