

# Divinity, Strain

Set like the sun  
Inevitable decay  
Dynasty devoured  
Once revealed, one severe  
Ever expanding massacre  
From the sick remains  
I scream for this life that I forsake  
Infect the viral strain.  
Everyday countless cells will die  
Hurry to take their place  
A life long disease. Eradicate  
Genetic viruliferous insides  
No trace of light  
Just selfless insight  
Crashing through the line  
Dissect then infiltrate the desire  
Forwarding design  
Suffer the consequence  
Even with a cure there is no time  
Alone, this parasite, given all of paradise  
Continual overload  
Red lines inside my eyes explode  
Strain  
Inside
