

DJ Bobo, World In Motion

Refrain:

World in motion

Everywhere

Wake up from your dreams

Open up your eyes and see the light

World in motion

All the time

Feel it in your heart

What you ever see with your own eyes

World in motion

1.

Journalism - for the mass

Greener - than the greenest grass

Naivety - isnt what we need

Every picture we see, every line we read

What about pollution, what about rain

what about the people suffering their pain

Criticism - is the magic word

To think about rumours we have heard

2.

We dont really care about what we see every day

From Moskow to Joburg from Rio to L.A.

We pretend to be a nation of tolerance and peace

But isnt it violence which increase

Headlines are shocking stories are brandnew

How can you be sure that everything is true

No difference between reality and show

Stimulation - overflow

3.

Its a world in motion

Every picture we see

A part of history

Its a world in motion

It will always last

Between future and past

Its a world in motion

Whats going on

What is wrong

Its a world in motion

Against the wind

Close your eyes and let it in
