

Dntel, Dreams

I wonder why the animals are thinking
late at night when its dark outside,
people are sleeping.

I had a friend who once told me
when you be friend then that they come into your dreams
and dance in the moonlight with you.

So i went outside night long without find
with a turn of the light and then with the sense
and then i saw them...*enemies*

I wasnt alone...

Feeling fine, its time
patience lets find,
passers with our guines
and lost the wild.

i turned off the light *dark*
turned off the stereos
and went outside *in the dark* *fine*
and try to find me,
we would become eternal forest
on the run
and the descent softly.

put them the need to run from me
cause all the machines
come chase on after this,
put them the need to run from me
cause all the machines
come chase on after this.
