

# Dolly Parton, Fight And Scratch

Fight and scratch fight and scratch that's all we ever do  
There surely must be more to love than to fight and scratch with you  
You you to fight and scratch with you

Well you just bought a foal last month now you want a wig  
It looks like you couldn't understand my paycheck ain't that big  
Well what about the dough you lose in them poker games downtown  
(I figured you'd mention that smart aleck)  
Yeah and that brand new boat and that fishin' gear  
But no uhhuh I don't reckon that'd count really

Fight and scratch fight and scratch...

Sometimes I swear I think that you're the devil in disguise  
Cause when you're mad you oughta see the fire fly from your eyes  
Well you don't look so cute yourself when you're mad at me  
And if you don't like the way I look then you know how to leave

Fight and scratch fight and scratch...

Well I love you and you love me but we're always findin' fault  
But the way we fight you wouldn't know we had any love at all  
We just fight like cats and dogs we'll leave then come right back  
For what excitement would we have if we didn't fight and scratch

Fight and scratch fight and scratch...

Why don't you drop dead oh you'd like me to and I'll live forever just for spite  
Why don't you keep your big mouth shut  
Well why don't you just make me if you think you're big enough  
Yeah and I could whip you with both hands tied behind  
Yeah you just try it with me and I'll knock your brains out  
With a stick of soap that's good Catfish  
What's a catfish why'd you call me that  
They're all mouth and no brains boy that's really good  
It's all I can do to keep from laughin' hah  
That's funny you sure are a funny little fellow
