

# Don Williams, Where Are You

Where is the sun,  
Where is the day I'm looking for  
Where is the moon,  
Where are the stars that shined before  
Where are you, where are you?

Where is the time when hours  
Were like minutes here before  
Where are the nights  
When it was warm and even on the floor  
Where are you, where are you?

--- Instrumental ---

Where are the eyes that looked at me  
With love and nothing more  
Where are the arms that made me feel so  
Welcome at the door  
Where are you, where are you?
