

Donell Jones, Wish You Were Here

Chorus

I've got this longing for you
Even when I call your name
How I wish you were here
A never-ending story of loneliness and pain
Oh, how I wish you were here

Verse 1

It's been so long since I saw your face
And I'm missing your warm embrace
Recapturing the times that we shared
Oh baby.... how I wish you were here

Chorus

Verse 2

Holding your hand, feeling your sweet lips
Brings me back to when we first met
What we had was not what we thought it would be
I would let nothing come between you and me

Bridge

All this time tell me where did it go
You and me, you said we would always be together
Can you see how I'm hurting inside
Won't you please
Baby, come back to me, yeah

Chorus

Interlude

Chorus to fade
