

# Donots, Get Going

I know I have found a perfect way to aggravate you without a word  
I would cast a glance at you and then I'd wait until it hurts  
You gotta listen to the silence, read between the lines that you can't find  
Cause it doesn't take a single word to tell you what is on my mind

So how much did you understand of everything I didn't say?

Get going - You work it out  
Get going - The time is running out  
Get going - Figure it out  
No need to talk about it  
Get going - You work it out  
Get going - The time is running out  
Get going - Go, sort it out  
No need to talk about it (now!)

I can feel the tension when I look at you like a loaded gun  
So you call me trigger-happy?  
Don't you know the show has just begun?  
I'll stare you down, I'll steal your crown without a sound  
Tell me, are you ready for a knock-out in the final round?

So how much did you understand of everything I didn't say?  
There's truth in what you haven't heard  
And hush is a four-letter word  
So here I sit and watch you burn  
And stare until your stomach churns  
You can't run and you can't hide  
I'm gonna strike you with my eyes
