

Doomsday Refreshment Committee, The Taste C

Another day so cold
So lost without you
And the heart break unfolds
I am reaching for you
Broken and alone
I am blind without you
Still twisting on my head
I am bleeding for you

When you look at me
You take the pain away

You make me feel complete
And nothing breaks me
To feel you next to me
There is nothing I cant do
Together we are one
How I love the taste of you

Stand in front of me
How I dream to touch you
I am never lost
I belong to you
Together we are one
Every breath for you
Still burning in my head
I love the taste of you

When you look at me
You take the pain away
You make me feel complete
And nothing breaks me
To feel you next to me
There is nothing I cant do
Together we are one
How I love the taste of you

When you look at me
You take the pain away
You make me feel complete
And nothing breaks me
To feel you next to me
There is nothing I cant do
Together we are one
How I love the taste of you
