

# Dopamine, Everything You Need To Know About

Everything you need to know about breaking hearts is in this song  
Leave behind a trace of hope, shower it and then dissolve  
To separate is easier, to give you time to change your mind  
To think about the things we did before  
To give you space is obvious, to say these words is meaningless  
To get another chance at being bored  
I'm here, alone, still searching  
I'll wait in line for a new life  
Thank you all coming around  
Hope your doing alright  
I'm losing myself and its my fault  
I'm creating my problems for once  
No answers that I can give to you, you may find this hard  
You don't deserve it, but I can not fake it now for once
