

# Dorling, Got It Bad

Open up  
Open up  
Look inside  
Look inside  
There's something here that wasn't ever here before  
Its growing and you're gonna have to shut the door  
Feeling it take over, you hear your body clear  
Taking all the tension, wiping out the fear  
Your mouth curls to smile and eyes light up  
The sun shines down on you, and you feel the luck

What is it that's happening to destroy the pain?  
No matter where it is you go, you cannot see the rain

You got it bad boy  
There can be no doubt  
Something you didn't have before  
You can't live without

Open up  
Open up  
Look inside  
Look inside  
The light is spilling out, you have to shield your eyes  
Something's going on, you see behind the lies  
You're the winner here, there can be no doubt  
Because now you've got something you can't live without

What is it that's happening to destroy the pain?  
No matter where it is you go, you cannot see the rain

You got it bad boy  
There can be no doubt  
Something you didn't have before  
You can't live without

You've had a revolution  
The spite has drained and gone  
The loneliness is crumbling  
Let happiness go on

You got it bad boy  
There can be no doubt  
Something you didn't have before  
You can't live without
