

Doro, Egypt

What a dream come true I got the biggest crush on you
My whole body shakes
I know I'm gonna break
But God I'm craving for more
The only thing I really feel is the regret of my heart
Killing you with kindness
Like a junkie pushing all his shots
I'll take a bullet in for you
Or whatever you want me to
But don't you mistake it for love
I'll walk the razors just for you
To show you a thing or two
But don't you mistake it for love
When you come in view
I'm keeping cool but man I'm so damn hot for you
I thought it would be fun
But then again I think it's turnin' upside down, down, down
Many times I realise all the damage that is to be done
If you wanna see over the edge
I already feel like a loaded gun
Chorus
So you wanna play?
You wanna play with fire baby?
I'll show you fire
You're lookin' right at it
Watch me burn into your bloody soul
Many times I realise all the damage that is to be done
If you wanna go over the edge
I already feel like a loaded gun
I'll take a bullet in for you
Or whatever you want me to
But don't you mistake it for love
I'll walk the razors just for you
To show you a thing or two
But don't you mistake it for love
I'll take a bullet in for you babe
Or whatever you want me to
But don't you mistake it for love
I'll walk the razors just for you
To show you a thing or two
But don't you mistake it for love
