Doro, Egypt

What a dream come truel got the biggest crush on you

My whole body shakes

I know I'm gonna break

But God I'm craving for more

The only thing I really feel is the regret of my heart

Killing you with kindness

Like a junkie pushing all his shots

I'll take a bullet in for you

Or whatever you want me to

But don't you mistake it for love

I'll walk the razors just for you

To show you a thing or two

But don't you mistake it for love

When you come in view

I'm keéping cool but man I'm so damn hot for you

I thought it would be fun

But then again I think it's turnin' upside down, down, down

Many times I realise all the damage that is to be done

If you wanna see over the edge

I already feel like a loaded gun

Chorus

So you wanna play?

You wanna play with fire baby?

I'll show you fire

You're lookin' right at it

Watch me burn into your bloody soul

Many times I realise all the damage that is to be done

If you wanna go over the edge

I already feel like a loaded gun

I'll take a bullet in for you

Or whatever you want me to

But don't you mistake it for love

I'll walk the razors just for you

To show you a thing or two

But don't you mistake it for love

I'll take a bullet in for you babe

Or whatever you want me to

But don't you mistake it for love

I'll walk the razors just for you To show you a thing or two

But don't you mistake it for love
