Dr. Sin, Fly Away

No, don't wanna Bring you down It's lurking all around Nobody knows what lies Behind the door All that I've seen I can't take it anymore

Living and dying, loving And hating (I will show you) Look on the other side Living and dying, loving And hating (take my hand) Just searching fora sign

Fly away, through Another day All the sorrows fade Time will heal any Pain you feel Just fly away

No, no way we're Looking back Believe me that's a fact

Who do we blame when Nothing is left to say Always the same when no One gives a damm
