

# Dragonforce, Astro Warrior Anthem

Sands of time are running low, the clock is ticking  
Light the fuse about to blow, escape this city  
Our planet under siege, unleash the Necron fleet  
Strapped in and set to go, now blast into the great unknown, into the great unknown

Protectors of the stars we blaze towards the battlefield in force tonight  
A pulse of energy lights up the sky like supersonic dynamite  
The star of death awaits our power growing brighter than the burning sun  
Hold down your triggers and prepare to blow them all into oblivion

In a distant dream, but it's time to let it go  
With a burning in your heart, like lightning in the dark, flying  
Faster than light deadly we strike  
Under the gun, nowhere to run  
Meltdown approaching the earth is burning

Masters of the cosmic skies  
Faster take a rocket ride  
Through solar clouds our anthem sounds  
To defend to the last survivor

Warriors of galactic fire  
Soldiers of the great empire  
For future kings our anthem rings  
To defend to the last survivor  
Astro Warriors guardians of the sky  
Hear our battle cry

We laugh at death another enemy fighter bursting right into flames  
Feel the G-force caught in the crosshair of their lasers fire in our veins  
For the empire we fight and die above the wasteland burning down below  
So one more time it's do or die we're sent to fly into the danger zone

In a cosmic sea only memories of home  
With a vengeance in your hearts  
On the highway of the stars flying

Fighters deployed, cities destroyed  
Under the gun out on the run  
Meltdown approaching the earth is burning

Masters of the cosmic skies  
Faster take a rocket ride  
Through solar clouds our anthem sounds  
To defend to the last survivor

Warriors of galactic fire  
Soldiers of the great empire  
For future kings our anthem rings  
To defend to the last survivor  
Astro Warriors guardians of the sky  
Hear our battle cry

Through the black hole, through the galaxy  
For the glory of the federation  
Through the firestorm, through the hurricane  
For the dawn of a brand new day

Through the black hole, through the galaxy  
For the glory of the federation  
Through the firestorm, through the hurricane  
For the dawn of a brand new day

Start a riot, start a war, touch the path to glory

Every age comes to an end  
Tearing up, crashing down it's an endless story  
But we are one, the battle born, still flying

Faster than light deadly we strike  
Under the gun, nowhere to run  
Meltdown approaching the earth is burning

Masters of the cosmic skies  
Faster take a rocket ride  
Through solar clouds our anthem sounds  
To defend to the last survivor

Warriors of galactic fire  
Soldiers of the great empire  
For future kings our anthem rings  
To defend to the last survivor  
Astro Warriors guardians of the sky

Masters of the cosmic skies  
Faster take a rocket ride  
Through solar clouds our anthem sounds  
To defend to the last survivor

Warriors of galactic fire  
Soldiers of the great empire  
For future kings our anthem rings  
To defend to the last survivor  
Astro Warriors guardians of the sky  
Hear our battle cry
