## Dragpipe, Diablo Handshake

I never liked you

I never cared if

I was open (if i was open)

By the way this is

My answer (is my answer)

All the time that

You were falling (you were falling)

On the way to the battle

I'm living it my way

Living with the sickness created in you

I wanna love you forever

Love you forever

Even though there's weakness created in you

Gonna battle it my way

Battle it my way

Even though it's endless to see it in you

Gonna love you forever

Love you forever

Even though i'll never believe what's in you

I never liked you I never cared

I never cared if i was right

And you were ready

I never liked you

I never cared

I never liked you

I know that it's fatal

To live with this evil

I never thought that i would end up on the ground

Searching skies just to faze her

I hope to amaze her

I never thought that i would end up on the ground

Gonna battle it my way

Battle it my way

Even though it's endless to see it in you

Gonna love you forever

Love you forever

I never thought that i would end up on the ground

I never liked you

I never cared

I never liked if i were right

And you were ready

I never liked you

I never cared

I never liked you

Just in time to get it

Just in time to get it

Battle it my way

Battle it my way

I am just as fucked up as you are
