

Dredg, Jamais Vu (Demo)

I look to the sky,
Saw my body die
Gotta reappear up there.
To where I want to be, in her university
I found, I found, my own college.
I found, I found, a way to resolve this.

I'm not inside you
You're all around me
Is this what you needed to have to comfort you?
I wait all this time over you

Is this what you wanted? Is this what you needed to hear?
Took all that I've known
Is this what you wanted? Is this what you need me to feel?
Took all that I've found, yeah.

I'm not inside you
You're all around me
Is this what you needed to have to comfort you?
I wait all this time over you.

I went to the ground
Was pleased with what I found
Gotta reappear up here
It's where I'll always be
In her university
I've found I've found all my problems
I'm gone I'm gone finally solved this

I'm not inside you.
You're all around me.
Is this what you needed to have to comfort you?
I wait all this time over you.
