Drugstore, I Know I Could

I feel stained and Im in pieces

In my mouth the sad taste of the past I had

A thousand wasted kisses

But another glass

And a cigarette

Just anything

To help forget the things that

Every day I still find missing

Let the whole world crash down on me

And let the curtains rise

I could do so much harm

I could do you no good

Ill leave a stain in your heart

I would

Yeah, Im gonna mess up your life

And make you forever blue

Cos I could hurt you

I know I could

I know I could

Misty haze and the final rest

They say the first shall be the last

But not for me

Cos I dont believe it

So another glass

And a cigarette

Just any man

To help forget the things that

Every day I still find missing

Let the whole world crash down on me

And let the curtain rise

I could do so much harm

I could do you no good

Ill leave a stain in your heart

I would

Yeah, Im gonna mess up your life

And make you forever blue

Cos I could hurt you

I know I could

I know I could

'Cos I could do so much harm

Yeah I could do you no good

Ill leave a stain in your heart

I would

Yeah, Im gonna mess up your life

And make you forever blue

Cos I could hurt you

I know I could

I know I could
