

Dual Core, Give Me Wings

How's everybody doing out there?

My name's int eighty, representing Dual Core.

You're tuned in to the production of my man 6-4.

Thank you for joining us this evening, I see y'all out there.

London, Milan, Berlin, Tokyo, Wigan, Barcelona que tal? Manchester, Amsterdam, West Fort, Sao

Time to fly gotta spread those wings
long night ahead so let's see what it brings

1 part redbull, 1 part vodka
mix 'em together and you've got a good thing

Pour it up now when the daylight's departed
stars in the sky and we're just getting started

Once the sun sets we're beginning it right
whether out on the town or in for the night

Best drink ever, ask 'em to hand me one
royalty's desert, breakfast of champions

Who's to say we should quit before
programmin', dancin', i still want more

In the bar, man i'm feelin her thighs
at home the applications materialize

Overflow ints explode my code binges
so the whole image controls the zone, finished

Ladies and gentlemen it is an honor to be sharing the evening with you tonight

I'm feeling magnificent

Be sure to tip your bartenders! be good to them, they'll be good to you!

Six-four on the tables up here, I'm loving the beats

Oop! I think I need another round!

Time to fly gotta spread those wings
long night ahead so let's see what it brings

1 part redbull, 1 part vodka
mix 'em together and you've got a good thing

Time to fly gotta spread those wings
long night ahead so let's see what it brings

1 part redbull, 1 part vodka
mix 'em together and you've got a good thing

Back again, call a play in the huddle
it's the second verse, better make it a double

Just getting started blast off like the shuttle
my 5 o'clock shadow is growin a stubble

Party's still goin, keepin it movin
my drink tastes better, mood is improvin'

Convincing or clever, still my guess
thinking of whether we can dance more next

Half way there with more code to write
my wings carry me through the rest of the night

Functions, plugins, pointers and classes
style sheets, markup, refill the glasses

Added caffeine to increase the energy
can't discount it, i love all the memories

I want to be awake when the sun comes up
cause we run our lives, our lives don't run us

Time to fly gotta spread those wings
long night ahead so let's see what it brings

1 part redbull, 1 part vodka
mix 'em together and you've got a good thing

Time to fly gotta spread those wings
long night ahead so let's see what it brings

1 part redbull, 1 part vodka
mix 'em together and you've got a good thing

Thank you very much! Appreciate the love

My name is int eighty, Dual Core in your memory space

Thank you for having us

Enjoy the rest of your evening
