

Dub War, Nations

hay your country needs you
they give you weapons
and they send you abroad
just to fight for another mans country
and steal the things that he can't afford
a government full of promise
never made me feel at home
and in a system
that abused me
left me standing on my own
well i may not have a fancy car no
and i may not own my own home
but my choice of paths to follow
will always be my own
oh yeah
who's gonna save the nations
how we gonna save the nations
oh yeah
how we gonna save the nations
are you gonna save the nations
