

# Dubstar, St. Swithin's Day

Say the worst thing first  
You could swear you wouldn't change  
But my words had lips that chose to tip  
the balance just the same  
I believe that some things can work better in the dark  
But my one regret's we didn't get a torch before the start  
And now we'll never speak again  
My face says everything  
And now we'll never speak again  
My face says everything  
Say the worst thing first  
You said you couldn't, better wait  
But my words were knives that broke our lives  
I did it just the same  
I deceive, I try to be a bigger cheat than you  
But I know too late  
it's not so great to hide away the truth  
And now we'll never speak again  
My face says everything  
One my time for all times  
I should've shut my mouth  
and closed my eyes  
to cross my legs  
to save these words  
This face says everything  
And now we'll never speak again  
My face says everything  
And now we'll never speak again  
My face says everything  
And now we'll never speak again  
My face says everything  
One my time for all times  
I should've shut my mouth  
And now we'll never speak again
