Dunnery Francis, My Own Reality

I believe in a happy land
where the people die so we can understand
I still don't know if I'm for sure
but I hold a faith that what I feel is right
If you believe that your number one
very soon you'll be number one
Last night I crucified an old belief of mine
[CHORUS:]
Then I told everybody that I could fly
and the whole damn world they said I'd lost my mind
The priest and the bishop and the girl next door
laughed in my face they'll laugh no more
'Cause I don't know if I want them to see that I'm living in a
world
My own reality
What's true for you ain't true for me
One small step for man
One giant leap for mankind
I believe in a happy land
where the present day is really promised land
I still don't know if I'm for sure
but I hold a faith that what I see is right
If you believe that pigs can fly
very soon your pig will fly
Last night I crucified an old belief of mine

CHORUS

And if you believe that the world is against you
Then so it will be in your experience
And if you believe that you are poor and always will be
Then your experience will so prove to you
And I just know that your gonna be free when your living in
your world
Your own reality
What's true for you ain't true for me
