

Dynamite Boy, Satellite

I'm so unsure of what I'd say to you
If you'd listen
my words could cut you like a knife
whisper into my ears your darkest dreams
all your secrets
i'll keep them in my heart

come with me tonight in my satellite
we'll go anywhere you want
won't you take a ride in my satellite
we'll do anything you want

i've spent a lifetime living down my name
reputation
perhaps i'll change it for the worse
i'll offer what i can to comfort you
no conditions
our winter's crystal clear

come with me tonight in my satellite
we'll go anywhere you want
won't you take a ride in my satellite
we'll do anything you want

our holiday from misery

come with me tonight in my satellite
we'll go anywhere you want
won't you take a ride in my satellite
we'll do anything you want
we'll do anything you want
