

E-Type, When I Close My Eyes

Coming up coming up (2x)

I've been hiding from God and I almost got away
but now it's all coming back and it's time for me to stay
I see it all pass me by in my hibernated state
now I am here once again and it's time to meet my faith
(bridge)

When I'm on my own, (coming up 2x)

You're still there

When I'm all alone (coming up 2x)

always there

(chorus)

When I close my eyes

takes me back to the start

where it all seems so right

now we're drifting apart

When I close my eyes

Then we're back at the start

where it all seems so right

how come you're still in my heart?

If the fear of perfect moment

I'm on to something new

there is no fear I will always know

I did what I could

If something stands in my way

then I will break down the door

so please don't stand in my way

cause then is the full aboard

(bridge)

(chorus)

When I close my eyes

You are on your way tonight

You come all of the way to my heart

I've been hiding from god

and I almost got away

but now it's all coming back

and it's time for me to stay

I've seen it all pass me by in my hibernated state

now I am here once again

and it's time to meet my faith

(chorus)
