

# Earshot, Misery

looking through the hole of time, I can see the end is coming  
closer I can hear it calling, beating away at me  
touching every soul in fear, comforting from far and near  
how I wish you all the best, in all of your misery

Angry and I'm feeling so scared, only cuz I wanna face  
all these fears I close my eyes, I'm drifting out far away  
angry and I'm feeling so, only cuz I wanna face  
all these fears I close my eyes, to sleep off this misery

hello darkness there inside, blacking out the light of day  
stick your heart out open wide, let it go and find its way

looking through the hole of time, you'll never get away  
touching every soul in fear, in all of your misery  
looking through the hole of time, you'll never get away  
closer I can hear it calling, beating away at me

chorus
